

CONTEMPORARY FENCE DESIGN AND CONSTRUCTION

**PRODUCT ENDORSEMENT**

10/01/2006

Product : Multipanel.

*Our company has been specializing in contemporary fence design and construction since 2001. The majority of fence designs comprise of rendered traditional pillars/ retainers and full block out styles. We have used Hebel power panels extensively in our construction with great success. In 2004 we were introduced to Multipanel and commenced various fencing projects with this product. We saw immediate advantages and it has now become our companies' preferred choice over Hebel or brick alternatives.*

*Following are just a few advantages :-*

- 1. Light weight.*
- 2. Easy installation ( especially where access is an issue ).*
- 3. Extremely strong & durable.*
- 4. Compatible with Hebel.*
- 5. Easy to work with ( sanding, drilling, cutting etc.)*
- 6. Excellent finished surface for rendering or painting.*
- 7. Most importantly...100% waterproof thus eliminating issues of dampness and deterioration common with rendered constructions.*

*I would be pleased to assist if you have any further questions.*

*Trevor Thomas.  
Director.*
