

We used MultiPanel to line the interior walls of this bus conversion. MultiPanel's flexibility properties enabled us to keep with the original curve of the interior ceiling of the bus and shape around the dashboard area, ceiling fixtures and headboards in the drivers cabin and bedroom. Factors such as temperature and sound insulation, weight and water resistance are extremely important in refurbishing motor homes and we couldn't find a product more suitable than MultiPanel. The ease of installation and the freedom to choose the final finish add to its attractiveness. The seamless luxurious appeal of this motorhome refurbishment wouldn't have been achieved with any other product than MultiPanel.

Regards
Darcy
